## **Alogent Announces Strategic Partnership with DefenseStorm, Marrying Digital Banking and Credit Union Solutions with Cybersecurity, Cybercompliance and Fraud Protection**

*Partner institutions now able to control their entire digital workflow, including the management of outside threats.*

**Peachtree Corners, GA, September 18, 2018** – [Alogent \(@AlogentCorp\)](#), an innovator in end-to-end enterprise payment processing, content management and digital account opening solutions for financial institutions, today announced a partnership with [DefenseStorm](#), the leading cloud provider of cybersecurity and cybercompliance solutions designed exclusively for banks and credit unions.

“As financial institutions increasingly adopt digital, mobile and self-service solutions to meet consumer demand, they must be increasingly diligent about protecting their operations and their customers from cyber threats,” said Jason Schwabline, Alogent’s SVP of Product Management and Strategy. “With financial institutions of all sizes already facing tens of millions of cyber events each day, we have made it a priority to help our customers address what can be a costly and labor intensive challenge by partnering with a company that focuses exclusively on bringing effective and affordable cybersecurity and cybercompliance to credit unions and banks.”

It is estimated that more than \$75.2B will be spent globally on infrastructure protection and cybersecurity services in 2018 alone<sup>1</sup>. As consumers and businesses demand more digital tools, this spend is anticipated to rise, especially as financial intuitions fight for consumer loyalty with enhanced offerings.

“Alogent’s digital and cloud solutions are perfect complements to the DefenseStorm GRID, which leverages cloud technology to keep cybersecurity and cybercompliance continuously current, scalable and affordable,” said Steve Soukup, DefenseStorm’s Chief Revenue Officer. “By focusing exclusively on what banks and credit unions need with respect to cybersecurity and cybercompliance, we equip financial institutions to effectively detect, investigate and resolve outside threats, even when resources are constrained. We also streamline and simplify the process of providing evidentiary proof of cybersecurity compliance to regulators and auditors. Working closely with the cloud technology and banking industry experts at Alogent supports our continued commitment to optimizing cybersecurity and cybercompliance for financial institutions,” Soukup added.
